WHOA DOUGH DRY OUT?

If your **whoa dough™** has dried out, it may not always come back to life, but this is definitely worth a try!

(Always be sure to store **whoa dough** back in the container when not in use. Check to make sure the container is fully shut.)

TRY THIS!

- Rub 3-5 drops of water around the dough.
- Place in a microwaveable safe container.
- Microwave for 3-5 seconds.

For dough that is really dried out, it's OK to repeat this process ... but go slow. Too much water and it will turn sticky!

- Now, as you're playing with your **whoa dough**, add 3-5 drops of canola or coconut oil and mix in.

So much whoa in this dough. Make & mold countless creations.

WHOA! THAT'S SAFE!

- Gluten-Free
- Egg-Free
- Milk-Free
- Peanut-Free
- Soy-Free
- Non-Toxic

Say hi and share your little one's creations with us on TikTok, Instagram and Facebook @**chuckleandroar**.
